## FyreCHOKE

### ONE PIECE RETRO-FIT FIRE COLLARS

**Trafalgar FyreChoke One Piece Retrofit Fire Collars** are a premium collar designed to provide maximum protection against the spread of fire & smoke through walls and floors that are penetrated by plastic pipes.

FyreChoke collars are simple to install, utilising a hinge and integrated 'latch lock' mechanism, the two halves of the collar simply fit around the pipe and fasten together. The collar is then fastened to the wall or floor using integrated fixing lugs at the base of the collar.

Trafalgar's FyreChoke fire collars have been extensively tested to AS1530.4 & AS4072.1 in accordance with the Building Code of Australia. They have been installed on building sites throughout Australia and the world.

These fire collars have a high quality finish and are ideal for applications where aesthetics of the system are important and easy identification is paramount.

### APPLICATION

Trafalgar FyreChoke one piece retro-fit fire collars are designed and tested for use in both wall and floor applications. They can be simply secured to the surface using the integrated fixing lugs or cast-in for a permanent neat solution.

FyreChoke fire collars are suitable for use on PVC, HDPE & PPR plastic pipes up to 150mm diameter. They have been tested on a range of plastic pipe connectors, please consult with Trafalgar for approved matrix.
